Experience the SunTrac Difference

See why we're leading the way in HVAC innovation & service.

COST EFFECTIVE COOLING

Lower A/C energy usage 40% or more with a SunTrac Hybrid Climate System

Why SunTrac?

- Clean Technology
- Industry Leading Equipment
- 5-Year Warranty
- Tax Credit Eligible
- Future-Proof

Our Services

Hybrid Climate Systems
Using the energy of the sun to improve HVAC efficiency & operation

New HVAC Installation
Sales & Service of high efficiency systems

UV Air Filtration
Protect Indoor Air Quality with UV-C Filtration: Kills Viruses, Mold & Bacteria (Including COVID-19)

Energy Efficiency
Let Our Trained Technicians Check Your A/C Energy Profile and Ways to Improve Efficiency

Our Technology

Our patented active tracking technology captures radiant energy from the sun optimizing HVAC performance. This results in a variable speed/capacity system to unload while delivering full cooling output. Full cooling with lower amp draw means energy savings. Finally, an HVAC system that pays for itself through efficiency & incentives.

Indoor Air Quality

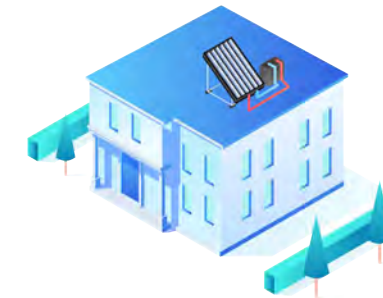

- Whole Office Air Filtration
- Eliminate Viruses, Bacteria & Mold
- Germicidal UV-C Light
- Activated Carbon Filtration
- Virtually Maintenance Free

UV-C Filtration
UV-C Light filtration eliminates viruses, mold & bacteria in the air

Did you know?
On average, indoor air quality is **5x** more polluted than outdoor air

The panel is integrated and mounted near the air conditioner. We size one panel per five tons of cooling capacity. Our systems integrate with multi-stage & variable speed equipment creating hybrid cooling solutions for:

- Office Space
- Warehouse/Mfg
- Hotel & Hospitality
- Single & Multi Family
- C-Stores
- Retail/Big Box
- Restaurant/QSR
- Indoor Agriculture

SunTrac Features

Hyper Efficiency
Variable speed A/C combined with renewable energy results in 40% less electricity usage

5 Year Warranty
5 year Parts & Labor Warranty on installed panel and HVAC equipment

Incentives
Qualifies for U.S. Federal Tax Credit & various state incentives

Climate Control

Precise temperature & airflow control with Smart enabled cloud thermostats

Savings

Rapid ROI with average energy savings of +40% plus financial incentives

Easy Integration

Small footprint, no utility approval required & low maintenance profile. Installed & serviced by licensed HVAC technicians
